PROFILE

Full-stack developer with over a decade of production experience — nine years at Cubewise, progressing from client-facing web developer to Lead AI Architect and Product Owner for the Apliqo UX platform, plus three years as a developer at ShapiroGraphics. Builds features end-to-end with TypeScript, React and Node.js on PostgreSQL and MySQL, designs APIs and services within cloud-based, service-oriented architectures, and works fluently with AI-assisted development tools (Claude, Cursor, Codex). Took AVA, the platform's AI assistant (LLM, RAG, conversational AI), from vision to production rollout. Comfortable in large, established codebases and with ambiguity — turning loosely defined opportunities into shipped, measured features. An earlier career in digital design shows in the craft: the empty state, the error message and the loading flicker get noticed without being asked.

TECHNICAL SKILLS

- **Languages & runtime** — TypeScript, JavaScript, SQL, Node.js
  - **Frontend** — React, Next.js
  - **APIs & integration** — GraphQL, REST API design, third-party API and SDK integration in production (auth, rate limits, versioning, outage response)
  - **Databases** — PostgreSQL, MySQL
  - **Cloud & architecture** — AWS, cloud-based service-oriented architectures, big-data scale and performance engineering
  - **AI-assisted development** — Claude, Cursor, Codex: prompting, iterating, validating and refining AI-produced code
  - **AI & GenAI** — LLM applications, retrieval (RAG), agentic systems, conversational AI, model evaluation and selection, AI governance
  - **Product & delivery** — product ownership, roadmap and backlog, stakeholder management, async-first collaboration across time zones
  - **Domain** — IBM Planning Analytics / TM1 (rules, TI processes, MDX, PAW/PAX, Arc); FP&A — budgeting, forecasting, scenario modelling, allocations

---

KEY ACHIEVEMENTS

- **Built and shipped enterprise white-label SaaS (Apliqo UX) end-to-end** for clients including Westpac, Amazon, AWS, Optus, Goodman, Everlight and ZKB
  - **Owned production API integrations end-to-end** — authentication, rate limits, versioning and outage response — connecting Apliqo UX with TM1's REST API and third-party services
  - **Took AVA — the platform's enterprise AI assistant — from vision and architecture through to production rollout**; launched September 2025, with deployments at Amazon, AWS and ZKB
  - **Designed services and APIs within a cloud-based, service-oriented architecture**, delivering big-data scale and performance for analytics-heavy workloads
  - **Established AI-assisted development practices (Claude, Cursor, Codex) and AI implementation standards** for the engineering team; mentored 10+ developers
  - **Trained and mentored 30+ consultants** in web-based application design, development and implementation

---

SELECTED WORK — LIVE

- **TokenizMyApp** — multi-tenant SaaS platform: tenant provisioning, metrics dashboards, AI-driven resource optimisation and AI chat · https://tokenizmyapp.vercel.app/
  - **TokenizMyApp Finance** — business-operations dashboard (CEO overview) with Google OAuth and staff-PIN role-based access, plus AI chat · https://tokenizmyapp-finance.vercel.app/
  - **PRESTIX.VIP** — VIP venue and event booking platform with search, cart and table-reservation ordering · https://prestix.vip/
  - **GoFetch** — global shopping and delivery platform frontend (Next.js) · https://gofetchapp.vercel.app/
  - **Gainwise** — secure AWS inventory reporting tool with Google-auth-gated admin access · https://gainwise-aws-inventory-report.vercel.app/
  - **ManaposeGP** — web application with a health-dashboard module · https://manaposegp.vercel.app/

PROFESSIONAL EXPERIENCE

Cubewise Pty Ltd — North Sydney, NSW

30 January 2017 – 27 January 2026 · role made redundant

Lead AI Architect & Product Owner — Apliqo UX platform

- Full-stack development of the enterprise white-label FP&A platform — self-service planning, forecasting and big-data analytics — with Apliqo UX as the product experience layer
  - Designed and evolved services and APIs within a cloud-based, service-oriented architecture; owned integrations in production, including authentication, rate limits, versioning and outage response
  - Product Owner of **AVA**, the platform's enterprise AI assistant — vision, architecture, roadmap, backlog, delivery and rollout, shaped to fit governance, UX and customer workflows; launched September 2025 with deployments at Amazon, AWS and ZKB
  - Led the design, strategy and execution of AI capabilities across the Apliqo UX platform; established AI-assisted development practices (Claude, Cursor, Codex) across the team
  - Evaluated and selected AI models for enterprise use cases — including conversational AI that lets finance teams query, explore and plan against TM1-based data in natural language
  - Set architecture, tooling and implementation standards with technical leads; mentored developers on AI implementation patterns

Web Development Consultant

- Designed, developed and implemented web-based planning, budgeting and reporting applications for TM1 clients, integrating with TM1's REST API in production
  - Supported sales and client support for Cubewise's web-based TM1 applications
  - Trained and developed fellow Cubewise consultants in web application design, development and implementation
  - Helped client finance teams finish budgeting faster, forecast more accurately and accelerate allocations and month-end close — without leaving Excel

Earlier career — digital design & development (2012–2016)

- **ShapiroGraphics** — Developer, Sydney · Oct 2013 – Oct 2016
  - **Optus** — Digital Designer, internal communications kiosk system · Mar – Jun 2013
  - **Telstra** — Digital Designer / Developer, online and point-of-sale campaign material · Nov 2012 – Mar 2013

———

HOW I WORK

- **Large, established codebases** — nine years evolving Apliqo UX: the judgment to know what is safe to change
  - **Ambiguity** — as Product Owner, turned loosely defined opportunities into shipped, measured features
  - **Craft** — an earlier digital design career: I notice the empty state, the error message and the loading flicker without being asked
  - **Communication** — async-first, working with product, design and business stakeholders across time zones
  - **Location** — New South Wales, Australia · open to Sydney, Melbourne or remote

---

EDUCATION & CERTIFICATIONS

- **Apliqo UX Certified Professional** — awarded for developing multiple applications with Apliqo UX and demonstrating advanced knowledge of the framework, including the ability to develop complex analytics applications
  - **TAFE NSW** — Advanced Diploma of Graphic Design · 2002 – 2004
