TECHNICAL SKILLS

AI / ML
LangGraph, LangChain, LlamaIndex, RAG (grounded on enterprise data), Vertex AI, OpenAI/Anthropic APIs, Ragas, LangSmith, prompt engineering, eval pipelines

Databases
MongoDB (production at enterprise scale), PostgreSQL, MySQL, SQL (advanced), Prisma, EF Core, vector stores (pgvector), Redis

BI / Data
Tableau, Power BI, Apache Spark, Snowflake, Databricks, dbt, ETL/ELT pipelines — BI and warehouse tooling alongside TM1/FP&A analytics context

Observability
Prometheus, Grafana, Sentry, Datadog, OpenTelemetry, structured logging, SLO-driven alerting

Backend
Java (Cubewise Arc and enterprise services), Node.js, NestJS, Express, Python (FastAPI, Flask), C# / .NET 8 (controllers, DI, EF Core,

Professional Summary

Full Stack Developer with 9 years' experience designing, building and operating enterprise-grade web applications end to end. Recently Lead AI Architect & Product Owner at Cubewise, where I took an enterprise GenAI assistant (AVA) from vision to production launch at Amazon, AWS and ZKB — React/Next.js front end, Node.js/Python services, MongoDB/PostgreSQL, GCP/AWS, LangGraph/LlamaIndex/RAG, Ragas/LangSmith evaluation, and full CI/CD with GitOps.

Core stack: React/Next.js, TypeScript, Node.js/NestJS, Python, C# (.NET fundamentals), MongoDB, PostgreSQL, MySQL, SQL, REST/GraphQL, Docker, Kubernetes (GKE/EKS), Terraform, GitHub Actions, Cloud Build, ArgoCD, Prometheus/Grafana/Sentry/Datadog.

AI-assisted delivery: daily practitioner of Claude Code, Cursor and Codex — shipped 5 live products AI-natively in 2024–25 (multi-tenant SaaS, OAuth/RBAC dashboards, booking platform, marketplace, LangGraph copilots). I write the specs, context and guardrails that make agents useful on real codebases.

Seeking: Senior AI Engineer at Biz Core (FSoft) to apply enterprise-grade craft across the full lifecycle — ticket to production, vision to launch.

Preferred Technologies

Front-end frameworks	Angular (Apliqo UX) · React · Next.js (App Router) · TypeScript · Redux Toolkit / RTK Query · Tailwind CSS · MUI
Back-end frameworks	Java (Cubewise Arc & services) · Node.js · NestJS · Express · Python (FastAPI · Flask) · C# / .NET (fundamentals) · REST · GraphQL

minimal APIs), REST, GraphQL, gRPC, SSE/WebSockets

Cloud / DevOps

AWS (ECS, Lambda, RDS, S3, CloudFront), GCP (Cloud Run, Vertex AI, Cloud Build), Azure (App Service, Functions), Docker, Kubernetes (GKE/EKS), Helm, Terraform, GitHub Actions, Cloud Build, ArgoCD (GitOps), feature flags, blue-green/canary, API versioning

Frontend

Angular (Apliqo UX platform, 2017–2024), React, Next.js (App Router), TypeScript, JavaScript (ES6+), HTML5, CSS3, Tailwind, MUI, Redux Toolkit, RTK Query, WebSockets/SSE, responsive/mobile-first

CMS / AEM

AEM 6.5 / Cloud Service — component development (HTL/Sightly), Core Components, ClientLibs, OSGi services, Sling Models, Dispatcher config, content fragments, GraphQL API, Cloud Manager pipelines

Practices

TDD/unit/integration/e2e (Vitest, Jest, Playwright, xUnit), code review, Agile/Scrum, trunk-based development, ADRs, threat modeling, OWASP

Cloud platforms	AWS (ECS · Lambda · RDS · S3 · CloudFront · Cognito) · Google Cloud Platform (Cloud Run · Vertex AI · Cloud Build) · Azure (App Service · Functions)
Databases	PostgreSQL · MySQL · MongoDB · Redis · pgvector (vector stores)
BI / Data	Tableau · Power BI · Apache Spark · Snowflake · Databricks · dbt · ETL / ELT
AI / ML	LangGraph · LangChain · LlamaIndex · RAG · Vertex AI · OpenAI / Anthropic APIs · Ragas · LangSmith
DevOps & CI/CD	Docker · Kubernetes (GKE/EKS) · Helm · Terraform · GitHub Actions · Cloud Build · ArgoCD (GitOps) · feature flags · blue-green/canary
Observability & Testing	Prometheus · Grafana · Sentry · Datadog · OpenTelemetry · Vitest · Jest · Playwright · xUnit · TDD

Professional Experience

CUBEWISE — Lead AI Architect & Product Owner (Apliqo UX / AVA)

Jan 2017 – Jan 2026 (9 years) · North Sydney, NSW

Role made redundant — available immediately.

Enterprise white-label FP&A SaaS (Angular/Java/Node, MongoDB) + AVA GenAI (React/Python on GCP)

AVA — Enterprise GenAI Assistant (Product Owner + Lead Architect)

- Designed and delivered AVA from vision to production (Sep 2025): LangGraph multi-step agent with human-in-the-loop gates, LlamaIndex RAG grounded on TM1 financial data, Vertex AI model selection, Ragas/LangSmith evaluation, responsible-AI controls.
- Deployed at Amazon, AWS, ZKB — passed governance reviews of three of the world's most demanding enterprise clients.
- Owned roadmap, backlog, stakeholder alignment; mentored 10+ developers on AI patterns; established AI-assisted development standards (Claude/Cursor/Codex).

Apliqo UX Platform (Full Stack + Platform Engineering)

- Apliqo UX (2017–2024): developed the enterprise white-label FP&A SaaS platform — Angular front end, Java and Node.js services, MongoDB/PostgreSQL — deployed to 7+ clients (Westpac, Amazon, AWS, Optus, Goodman, Everlight, ZKB).
- Cubewise Arc and related Java applications: built and maintained TM1/Planning Analytics integration tooling and server-side components used in client delivery.
- Platform engineering on AWS/GCP — CI/CD (GitHub Actions + Cloud Build), Docker/K8s (GKE/EKS), Terraform, GitOps (ArgoCD), observability (Prometheus/Grafana/Sentry/Datadog).
- Zero-downtime releases via feature flags, API versioning and blue-green deployments; performance engineering on TM1-scale workloads (web server optimisation, SSE/WebSockets).

AEM / CMS Experience

- Implemented AEM 6.5 component library (HTL, Core Components, ClientLibs, Sling Models) for marketing sites feeding into the SaaS platform.
- Configured Dispatcher/CDN caching, content fragments, GraphQL endpoints for headless consumption by React apps.
- Managed Cloud Manager pipelines for dev/stage/prod promotion.

FREELANCE / AI-NATIVE PRODUCTS (Claude/Cursor/Codex) — Founder / Lead Engineer

2023–2025 · Remote

5 live products built AI-natively, end to end

All products: CI/CD (GitHub Actions), Docker, feature flags, automated testing (Vitest/Playwright), deployed to Vercel/AWS/GCP.

Product (live)	Stack	Highlights
TMA (TokenizMyApp) https://tokenizmyapp.vercel.app/	Next.js, TypeScript, PostgreSQL, Prisma, ZenStack, Stripe	Multi-tenant SaaS factory: tenant provisioning, metrics dashboards, AI chat, wallet/SIWE (Reown AppKit), Stripe billing — root config for parameterized business apps
TMA Finance https://tokenizmyapp-finance.vercel.app/	Next.js, Node, PostgreSQL	CEO dashboard, Google OAuth, OAuth/RBAC, staff-PIN RBAC, AI chat
PRESTIX.VIP https://prestix.vip/	Next.js, TypeScript, PostgreSQL/ZenStack, Stripe	VIP venue booking, cart, table-reservation ordering, high-volume transactional flows; companion SIWE/OAuth auth module (email OTP, Google, JWT sessions, 2FA)
WTE — Indonesia Waste-to-Energy Copilot https://wte-copilot-670560975972.us-central1.run.app/	Python 3.12, FastAPI, LangGraph, Vertex Gemini, Chroma, Firestore, Cloud Run	Grounded copilot for Indonesia carbon & WTE market: LangGraph supervisor + specialists, section-aware Chroma RAG, FastAPI SSE streaming, Firestore history, Ragas eval on GCP Cloud Run

Product (live)	Stack	Highlights
GoFetch https://gofetchapp.vercel.app/	Next.js, TypeScript, Python, Solidity	P2P cross-border marketplace: TypeScript UI, Python services, smart-contract escrows and stablecoin settlement

Selected engineering evidence (GitHub portfolio)

- Multi-tenant Next.js/Prisma/ZenStack factory with Stripe and wallet auth patterns. — https://tokenizmyapp.vercel.app/
- LangGraph + Chroma RAG + FastAPI SSE on Cloud Run (WTE Navigator / wte-copilot/). — https://wte-copilot-670560975972.us-central1.run.app/
- FastAPI streaming API, React client, MongoDB sessions, Chrome extension. (GitHub: reward2learn/aws-chatbot)
- Deployable Stripe storefront (Next.js + Radix). — https://simple-online-store-with-stripe-five-rho.vercel.app
- Agent policies, skills, MCP servers, Cursor/VS Code scaffolding. (GitHub: tokenizin/ide-agent-plugin)
- Chrome extension + Vercel feed server (OpenAI, JWT, Blob). — https://devlynx-black.vercel.app
- Ionic/Capacitor, Firebase auth, Apollo GraphQL. — https://kclubapp.vercel.app
- Marketplace UI with Python services and Solidity escrows. — https://gofetchapp.vercel.app
- OAuth-ready Next.js/Prisma greenfield starter. — https://app-oauth-tokenizin-projects.vercel.app
- SIWE/OAuth module: email OTP, Google, JWT sessions, 2FA. — https://prestixapp.vercel.app
- Web3, 3D, and voice/AI integrations in a production monorepo. — https://starguard.vercel.app
- OpenCode AI coding cockpit fork (TypeScript/Rust). (GitHub: reward2learn/CodeNomad)
- ZenStack/Prisma Next.js with Nivo charts and auth. — https://living-museum-master.vercel.app
- Vite/React/Tailwind agency site with motion and screenshot automation. — https://tokenizin-site.vercel.app

SHAPIROGRAPHICS / TELSTRA / OPTUS — Digital Design & Development

2012–2016 · Sydney/Melbourne

Client-facing web design and development for enterprise telco accounts. Origin of craft: empty states, error messages, loading flickers — noticed without being asked.

Education & Certifications

- TAFE NSW — Advanced Diploma of Graphic Design (2002–2004)
- Apliqo UX Certified Professional
- Valid Employee Working With Children Check (VIC/NSW)
- National Police Check (current)
- Unrestricted work rights in Australia (Citizen)
- AWS Solutions Architect Associate (in progress)
- Google Cloud Professional Cloud Developer (in progress)
